

Rechargeable Sealed Lead Acid Battery

(6V 12Ah)

BC-6100F1

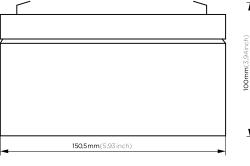

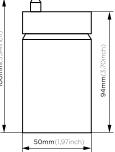

These rechargeable batteries are lead-lead dioxide systems. The dilute sulfuric acid electrolyte is absorbed by separators and thus immobilized. Should the battery be accidentally overcharged producing hydrogen and oxygen, special one-way valves allow the gases to escape thus avoiding excessive pressure build-up. Otherwise, the battery is completely sealed and is, therefore, maintenance-free, leak proof and usable in any position.

Application

- · Alarm System
- · Cable Television
- · Communication Equipment
- · Control Equipment
- · Security System
- · Medical Equipment
- · UPS
- · Power tools
- · Emergency Power System
- · Toys

Battery Construction										
Component	Positive plate	Negative plate	Container	Cover	Safety valve	Terminal	Separator	Electrolyte		
Raw material	Lead dioxide	Lead	ABS	ABS	Rubber	Copper	Fiberglass	Sulfuric acid		

T⊒D⊕

General Features

- Absorbent Glass Mat(AGM) technology for efficient gas recombination of up to 99% and freedom from electrolyte maintenance or water adding.
- Not restricted for air transportcomplies with IATA/ICAO Special Provision A67.
- UL-recognized component.
- Can be mounted in any orientation.
- Computer designed lead, calcium tin alloy grid for high power density.
- Long service life, float or cyclic applications.
- Maintenance-free operation.
- Low self discharge.

Performance Characteristics
